The publishers have the pleasure of anneuncing that this long-expected work, upon which Mr. Parton has been indefatigably eugaged for some years, and on which he has beetowed an amount of careful research and laborious investigation rarely given to a biography, is now so far progressed that the first volume will be published on Saturday, November 18. The work will form Three Octavo Volumes of about 650 pages each. The other volumes will be published on Saturday, November 18. The work will form three Octavo Volumes of about 650 pages each. The other volumes will be of the best qualky.

Each will have one or more Steel Portraits, and the paper, printing and binding will be of the best qualky.

Ueneral Jackson is, without doubt, one of the most interesting subjects for biography in American History. His life was crowded with events, and the whole of his career was poculiar, extraordinary, interesting, beyond that of any of his cotemporaries. In his own lifetime he was the most popular of American citizens, and since his death there is but one name more endeared than his to the masses of the people.

The Publishers deem it unnecessary to do more than allude to Mr. Parton's qualifications for so important a work. His rare powers of research, investigation and analysis; his faculty for grouping incidents and persons with picture-sque effect; his transparent honesty of purpose; the precision, clearness and vigor of his style, unite to place him in the front rank of biographers who have written in the English language.

Sold By Strackurptor Only. Agents wanted to solicit subscriptions in every county in the United States.

From The Edinburgh Review for Oct., 1863.

"There is one point in which Fielding is a model for all times, and in which Mr. Thackeray is his worthy disciple, and, we venture to think, perfectly his equal. That point is, style and beauty of composition. The last century was certainly more studious, generally speaking, of form than ours. You may open any pace of Fielding at random and read it with pleasure, without reference to the story or context, merely as a piece of exquisito writing. The same may be said of Thackeray. It can hardly be said of any one dee among the novelists of our day, most of whom seem never to have apprehended beauty of composition as a distinct object to be aimed at, and one which requires a distinct effort of the intellect in order to its achievement. Let them, if they wish to please greatly and live long, study their great leader's art

of the intellect in order to its achievement. Let them, it wish to please greatly and live long, study their great leader's art in narrative, description, and dialogue, and those beautiful mimiature cessays, perfect in form as crystals, in which the sentiment of his novels is here and there condensed."

CURRER BELL, Author of "Jane Eyre," &c.

"Why have I alluded to this man! I have alluded to him, reader, because I think I see in him an intellect profounder and more unique than his cotemporaries have yet recognized; because I regard him as the first social regenerator of the day—as the very master of that working corps who would restore to rectitude the master of that working corps who would restore to rectifade the warped system of things; because I think no commentator on his writings has yet found the comparison that suits him, the terms which rightly characterize his talent. They say he is like Fielding; they talk of his wit, humor, condo powers. He resembles Fielding as an eagle does a valure; Fielding could stoop on carrien, but Thackerary never does. His wit is bright, his humor attractive, but both bear the same relation to his serious genius that the more lambert sheet lighting, playing under the edge of that the mere lambent sheet-lightning, playing under the mer cloud, does to the electric death-spark hid in its
